Abstract— This document describes the Camera Ready format for the papers to be presented at the International Conference on Software Development for Enhancing Accessibility and Fighting Info-exclusion (DSAI 2009). It is mostly based on what the IEEE recommends for similar publications. The abstract should be no longer than 200 words. Use size 9 bold for the abstract.

I. INTRODUCTION

Final camera-ready papers must be submitted preferably in PDF format (DOC or RTF also accepted) according to the formats specified in this document for publishing. Please **do not use any** Headers, Footers or Line Numbers.

II. FORMATTING

A. General Format

Manuscripts should be formatted to A4 paper size (21.0×29.7cm). The text may be formatted either in one column with 16,0cm width or two columns, each with 8.0cm width. We recommend 10 Times font in the body of the text with single line spacing. Table I shows the page margins.

Table I: Page margins

Left margin	2.4cm
Right margin	2.4cm
Top margin	2.8cm
Bottom margin	2.8cm

B. Title

The title is page-centered, using the width of two columns, but within the margins. Size is 14, bold. All words should be capitalized except prepositions, articles and conjunctions. Suggested: name(s) of the author(s) (12pt), affiliation and full address, including phone, fax and e-mail, should follow immediately, on separate lines (10pt).

C. Headings

Section titles and subsection titles should be distinct and stand out from the text itself. Small capitals must be used for section titles (e.g., II. FORMATTING) and italic for subsections (e.g., C. Headings).

D. Figures and Tables

Figures and tables should be placed as close as possible to their first mention in the text. Text within figures and tables should be smaller in size but still large enough for clear reproduction. Size 9 or 8 is recommended.

All figures and tables should have a sequential numbering, with caption above tables and underneath figures, as shown on Table I and Figure 1.

Fig. 1. Example of a figure and its caption.

E. References

All bibliographic references should appear at the end of the document, in a separate section entitled “REFERENCES”. Citations in the text that point to a particular reference are indicated by the reference number within brackets [1].

F. Equation Numbering

Each equation must be centered on a separate line. They should have a sequence number (1), right justified.

G. Symbols and Acronyms

Use of symbols and units of the International System (SI) is recommended. All acronyms should be defined at the time of their first occurrence.

III. PAPER SUBMISSION

Authors are invited to submit camera-ready full papers, no longer than 8 pages, preferably in PDF format using the electronic submission procedure explained in the conference web site. The deadline for submissions is March 8, 2009.
